

# Research Questions and the GSS

MATH 213

# Group 1

The General Social Survey (GSS) is a nationally representative survey of adults in the United States conducted since 1972. The GSS collects data on contemporary American society in order to monitor and explain trends in opinions, attitudes and behaviors. (Quoted from the GSS website, [here.](#))

I downloaded some data from the GSS for all years the survey was conducted from 1972 to 2021.

The cases in the dataframe are the adults who were surveyed. [Here is a list of some of the variables in my dataframe.](#)

See below for the first few rows of the dataframe.

| id_ | year | wrkstat           | marital       | childs | age | educ | partyid                            | gunlaw | pres16                         |
|-----|------|-------------------|---------------|--------|-----|------|------------------------------------|--------|--------------------------------|
| 1   | 1972 | Working full time | Never married | 0      | 23  | 16   | Independent, close to democrat     | FAVOR  | .y: Not available in this year |
| 2   | 1972 | Retired           | Married       | 5      | 70  | 10   | Not very strong democrat           | FAVOR  | .y: Not available in this year |
| 3   | 1972 | Working part time | Married       | 4      | 48  | 12   | Independent (neither, no response) | FAVOR  | .y: Not available in this year |
| 4   | 1972 | Working full time | Married       | 0      | 27  | 17   | Not very strong democrat           | FAVOR  | .y: Not available in this year |
| 5   | 1972 | Keeping house     | Married       | 2      | 61  | 12   | Strong democrat                    | FAVOR  | .y: Not available in this year |
| 6   | 1972 | Working full time | Never married | 0      | 26  | 14   | Independent, close to democrat     | OPPOSE | .y: Not available in this year |
| 7   | 1972 | Working full time | Divorced      | 2      | 28  | 13   | Independent, close to democrat     | FAVOR  | .y: Not available in this year |
| 8   | 1972 | Working full time | Never married | 0      | 27  | 16   | Independent, close to democrat     | FAVOR  | .y: Not available in this year |
| 9   | 1972 | Working part time | Never married | 2      | 21  | 12   | Strong democrat                    | FAVOR  | .y: Not available in this year |
| 10  | 1972 | Working full time | Married       | 4      | 30  | 12   | Strong democrat                    | FAVOR  | .y: Not available in this year |

1. Write two research questions, each based on ONE variable, that you could potentially answer using the dataset.

What is the popularity of gun control legislation among the general populous?

What is the average age of survey respondents?

1. Write two research questions, each based on TWO or MORE variables, that you could potentially answer using the dataset.

Does there exist a correlation between people with children who are in favor of gun control legislation and people without children who are opposed to gun control legislation?

Is there a correlation between age and party affiliation?

## Group 2

The General Social Survey (GSS) is a nationally representative survey of adults in the United States conducted since 1972. The GSS collects data on contemporary American society in order to monitor and explain trends in opinions, attitudes and behaviors. (Quoted from the GSS website, [here.](#))

I downloaded some data from the GSS for all years the survey was conducted from 1972 to 2021.

The cases in the dataframe are the adults who were surveyed. [Here is a list of some of the variables in my dataframe.](#)

See below for the first few rows of the dataframe.

| id_ | year | wrkstat           | marital       | childs | age | educ | partyid                            | gunlaw | pres16                         |
|-----|------|-------------------|---------------|--------|-----|------|------------------------------------|--------|--------------------------------|
| 1   | 1972 | Working full time | Never married | 0      | 23  | 16   | Independent, close to democrat     | FAVOR  | .y: Not available in this year |
| 2   | 1972 | Retired           | Married       | 5      | 70  | 10   | Not very strong democrat           | FAVOR  | .y: Not available in this year |
| 3   | 1972 | Working part time | Married       | 4      | 48  | 12   | Independent (neither, no response) | FAVOR  | .y: Not available in this year |
| 4   | 1972 | Working full time | Married       | 0      | 27  | 17   | Not very strong democrat           | FAVOR  | .y: Not available in this year |
| 5   | 1972 | Keeping house     | Married       | 2      | 61  | 12   | Strong democrat                    | FAVOR  | .y: Not available in this year |
| 6   | 1972 | Working full time | Never married | 0      | 26  | 14   | Independent, close to democrat     | OPPOSE | .y: Not available in this year |
| 7   | 1972 | Working full time | Divorced      | 2      | 28  | 13   | Independent, close to democrat     | FAVOR  | .y: Not available in this year |
| 8   | 1972 | Working full time | Never married | 0      | 27  | 16   | Independent, close to democrat     | FAVOR  | .y: Not available in this year |
| 9   | 1972 | Working part time | Never married | 2      | 21  | 12   | Strong democrat                    | FAVOR  | .y: Not available in this year |
| 10  | 1972 | Working full time | Married       | 4      | 30  | 12   | Strong democrat                    | FAVOR  | .y: Not available in this year |

1. Write two research questions, each based on ONE variable, that you could potentially answer using the dataset.

What is the average education of the GSS?

How many kids do GSS participants have on average?

2. Write two research questions, each based on TWO or MORE variables, that you could potentially answer using the dataset.

Does the individuals view on gun law affect their presidential vote?

How does number of children affect stance on gun laws?

# Group 3

The General Social Survey (GSS) is a nationally representative survey of adults in the United States conducted since 1972. The GSS collects data on contemporary American society in order to monitor and explain trends in opinions, attitudes and behaviors. (Quoted from the GSS website, [here.](#))

I downloaded some data from the GSS for all years the survey was conducted from 1972 to 2021.

The cases in the dataframe are the adults who were surveyed. [Here is a list of some of the variables in my dataframe.](#)

See below for the first few rows of the dataframe.

| id_ | year | wrkstat           | marital       | childs | age | educ | partyid                            | gunlaw | pres16                         |
|-----|------|-------------------|---------------|--------|-----|------|------------------------------------|--------|--------------------------------|
| 1   | 1972 | Working full time | Never married | 0      | 23  | 16   | Independent, close to democrat     | FAVOR  | .y: Not available in this year |
| 2   | 1972 | Retired           | Married       | 5      | 70  | 10   | Not very strong democrat           | FAVOR  | .y: Not available in this year |
| 3   | 1972 | Working part time | Married       | 4      | 48  | 12   | Independent (neither, no response) | FAVOR  | .y: Not available in this year |
| 4   | 1972 | Working full time | Married       | 0      | 27  | 17   | Not very strong democrat           | FAVOR  | .y: Not available in this year |
| 5   | 1972 | Keeping house     | Married       | 2      | 61  | 12   | Strong democrat                    | FAVOR  | .y: Not available in this year |
| 6   | 1972 | Working full time | Never married | 0      | 26  | 14   | Independent, close to democrat     | OPPOSE | .y: Not available in this year |
| 7   | 1972 | Working full time | Divorced      | 2      | 28  | 13   | Independent, close to democrat     | FAVOR  | .y: Not available in this year |
| 8   | 1972 | Working full time | Never married | 0      | 27  | 16   | Independent, close to democrat     | FAVOR  | .y: Not available in this year |
| 9   | 1972 | Working part time | Never married | 2      | 21  | 12   | Strong democrat                    | FAVOR  | .y: Not available in this year |
| 10  | 1972 | Working full time | Married       | 4      | 30  | 12   | Strong democrat                    | FAVOR  | .y: Not available in this year |

1. Write two research questions, each based on ONE variable, that you could potentially answer using the dataset.

What is average amount of children?

What is the proportion of people are under 40?

1. Write two research questions, each based on TWO or MORE variables, that you could potentially answer using the dataset.

What is the average age of people that have voted for the gun law?

What is the proportion of people who voted are married?

# Group 4

The General Social Survey (GSS) is a nationally representative survey of adults in the United States conducted since 1972. The GSS collects data on contemporary American society in order to monitor and explain trends in opinions, attitudes and behaviors. (Quoted from the GSS website, [here](#).)

I downloaded some data from the GSS for all years the survey was conducted from 1972 to 2021.

The cases in the dataframe are the adults who were surveyed. [Here is a list of some of the variables in my dataframe.](#)

See below for the first few rows of the dataframe.

| id_ | year | wrkstat           | marital       | childs | age | educ | partyid                            | gunlaw | pres16                         |
|-----|------|-------------------|---------------|--------|-----|------|------------------------------------|--------|--------------------------------|
| 1   | 1972 | Working full time | Never married | 0      | 23  | 16   | Independent, close to democrat     | FAVOR  | .y: Not available in this year |
| 2   | 1972 | Retired           | Married       | 5      | 70  | 10   | Not very strong democrat           | FAVOR  | .y: Not available in this year |
| 3   | 1972 | Working part time | Married       | 4      | 48  | 12   | Independent (neither, no response) | FAVOR  | .y: Not available in this year |
| 4   | 1972 | Working full time | Married       | 0      | 27  | 17   | Not very strong democrat           | FAVOR  | .y: Not available in this year |
| 5   | 1972 | Keeping house     | Married       | 2      | 61  | 12   | Strong democrat                    | FAVOR  | .y: Not available in this year |
| 6   | 1972 | Working full time | Never married | 0      | 26  | 14   | Independent, close to democrat     | OPPOSE | .y: Not available in this year |
| 7   | 1972 | Working full time | Divorced      | 2      | 28  | 13   | Independent, close to democrat     | FAVOR  | .y: Not available in this year |
| 8   | 1972 | Working full time | Never married | 0      | 27  | 16   | Independent, close to democrat     | FAVOR  | .y: Not available in this year |
| 9   | 1972 | Working part time | Never married | 2      | 21  | 12   | Strong democrat                    | FAVOR  | .y: Not available in this year |
| 10  | 1972 | Working full time | Married       | 4      | 30  | 12   | Strong democrat                    | FAVOR  | .y: Not available in this year |

1. Write two research questions, each based on ONE variable, that you could potentially answer using the dataset.
  - What proportion of individuals are married?
  - What is the average age of voters?
  
2. Write two research questions, each based on TWO or MORE variables, that you could potentially answer using the dataset.
  - Does marital status and number of children affect the opinion for gun law?
  - Does being below the age of 30 impact the opinion of those for or against the gun law?
  - Does level of education affect an individual's party?

| 10  | 1972 | Working full time | Married       | 4      | 30  | 12   | Strong democrat                    | FAVOR  | .y: Not available in this year |

1. **Write two research questions, each based on ONE variable, that you could potentially answer using the dataset.**

Of those surveyed, how many americans support gun laws?

What is the average age of americans surveyed?

2. **Write two research questions, each based on TWO or MORE variables, that you could potentially answer using the dataset.**

How does work status affect likelihood to vote democrat?

Do people with children tend to be in favor of or against gun laws?

1. Write two research questions, each based on ONE variable, that you could potentially answer using the dataset.

- 1) On average how many children do Americans have?
- 2) What is the majority work\_status of Americans?

1. Write two research questions, each based on TWO or MORE variables, that you could potentially answer using the dataset.

- 1) Any proportion between party\_id and choice for gun law?
- 2) How does level of education affect work status of Americans?

# Group 9

The General Social Survey (GSS) is a nationally representative survey of adults in the United States conducted since 1972. The GSS collects data on contemporary American society in order to monitor and explain trends in opinions, attitudes and behaviors. (Quoted from the GSS website, [here.](#))

I downloaded some data from the GSS for all years the survey was conducted from 1972 to 2021.

The cases in the dataframe are the adults who were surveyed. [Here is a list of some of the variables in my dataframe.](#)

See below for the first few rows of the dataframe.

| id_ | year | wrkstat           | marital       | childs | age | educ | partyid                            | gunlaw | pres16                         |
