

HW 1

Questionnaire, Syllabus Scavenger Hunt, Find Nick's Office

Welcome to MATH 207 Discrete Math!

Please answer the following questions. When you have answered the questions, turn this in as directed in the last question.

1. Tell me a few things about you!

- a. What is your name, as you want me to call you in class:
- b. What was the last math class you have taken?
- c. When and where was it?
- d. What is your major or intended major?
- e. Why are you taking MATH 207 Discrete Math? (e.g. core requirement, major requirement, interested in the class, etc.)
- f. Is there anything about math that makes you nervous about at this stage?
- g. What are your hopes for this class?

2. To answer the following questions, you will need to read the course syllabus! Or look on our BB page.
- a. How many textbooks does the course have? How much do they cost?
 - b. What kind of calculator do you need for this course?
 - c. How many exams will there be in this course? When are they?
 - d. Are you allowed to work with other people on homework assignments? What are the rules for collaboration?
 - e. How will you submit assignments?
 - f. How do you attend my office hours?
 - g. Where is my physical office?
3. In your own words, explain when a conditional statement is true. (You will need to wait until after we discuss this in class.)
4. Make a truth table for the following: $P \wedge \neg Q$
5. Come find my office during office hours! To turn this in, it must be handed to me in person!
